

Accessories Description

Wire Brushes are used for cleaning, polishing, removing rust and paint, etc. on various materials including metal.

Nylon and Natural Hair brushes are used for removing minor scratches, cleaning and buffing on soft surfaces like plastic, ceramic, POP, soft metals, leather, etc. It can be used with polishing paste for polishing surfaces.

Sanding Bands are used with mandrels for smoothening, shaping, finishing on wood, ceramic, plastic, rubber and other soft surfaces.

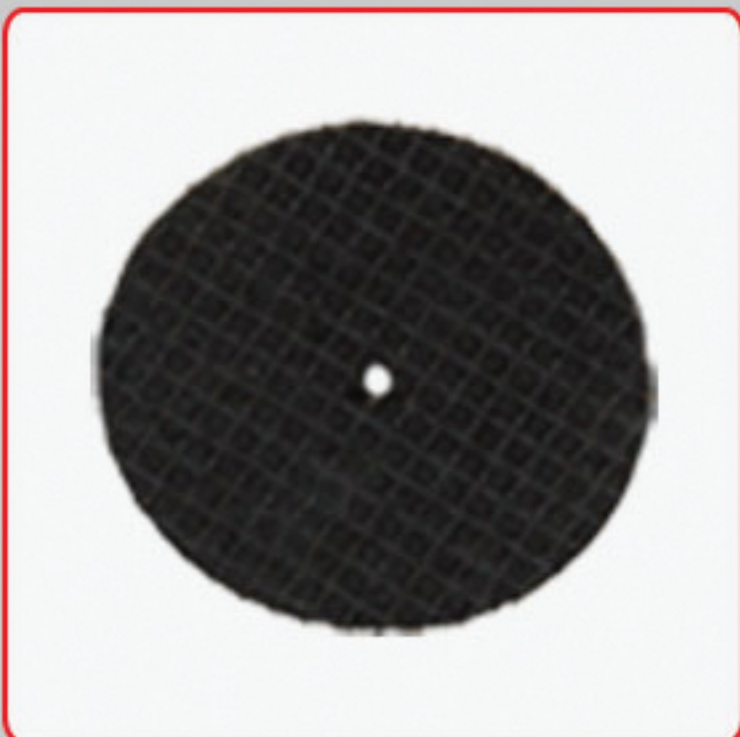

Grinding Stones are used for grinding, deburring, sharpening, etching, carving on variety of surfaces including ferrous and non ferrous metals, stone, glass, ceramics, porcelain, etc. Unmounted stones are attached with Screw Mandrel. Eg: Removing flush after casting, sharpening knife, scissors, etc.

Sanding Discs are used for smoothening, shaping, finishing on soft metals, wood, ceramic and other soft surfaces. Thinness of the disc makes it possible to reach hard to reach and narrow areas.

Felt buffs are used with mandrel for cleaning, buffing and polishing metals including precious metals. Clean and smoothen the surface without using paste and then give a shining lustre finish with polishing paste/-compound to your masterpiece. Eg: Cleaning watch, polishing ring, etc.

Fibre Glass Reinforced Cutting Wheels are used for cutting hard metals including hardened steel, aluminum, cast iron, marble, copper, brick, etc.

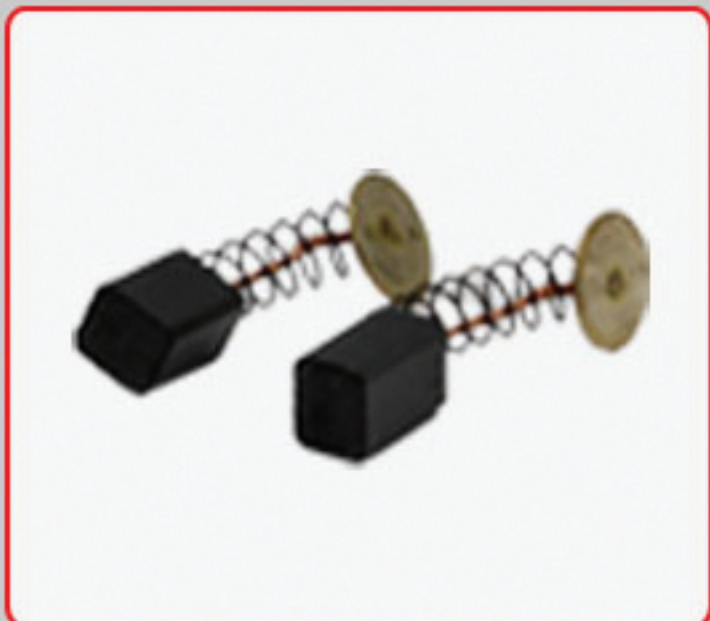

Resin Cutting Wheels are used for giving precise cut on metals. Cutting hard metals, trimming protruding bolts, screws & nuts, etc.

HSS Cutters are used for cutting plastic, ceramic, POP, wood, etc.

Diamond Burs are used for detailed engraving, carving, touch up on ceramic, glass, marble, granite, precious stones, hardened steel, etc. The diamond coating of the bur enables precise and deep cutting of the surface for neat and deft job.

Carbon Brushes are used for functioning of armature.

HSS Drills are used for drilling holes in wood, ceramic, metal, plastic, etc.

Screw Mandrel & Felt Buff Mandrel for emry discs, cutting wheels, polishing felts, etc.

Rotary Burs are used for carving, engraving, routing, shaping in fiberglass, plastic, wood and soft metals like copper, brass, aluminum.

Sanding Drum Mandrels

Collet Attachments of different size for mandrels and drills.
